

I COMPLY

Safety & Environmental Compliance Consultants, Inc. is a full service consultant to small business that designs training programs and provides consulting services on a retained basis. We provide MSDS management, compliance inspections and consulting services to our full service clients.

We recognize that some small businesses do not have a need for our full service and have designed a program that would cover the same goal of helping those clients comply with the ever-changing government regulations. That program is the **I COMPLY** system.

The **I COMPLY** training system was written for dry cleaners and is composed of seven sections, covering the following:

Hazard Communication Standard Program	Lockout/Tagout Program
Fire Safety Program	Housekeeping Program
First Aid and Safety Program	Bloodborne Pathogens Program
Hazardous Waste Management Program	

The **I COMPLY** system is designed for the business owner to implement himself, using the information contained. It is not intended to include MSDS management or facility inspection; these can be included but are normally part of the full compliance services of Safety & Environmental Compliance Consultants, Inc.

The fee schedule for the **I COMPLY** system follows this schedule:

I COMPLY System materials	\$ 545.00
Employee Training	\$ 500.00
MSDS Management	\$ 500.00
Monthly Maintenance Fee	\$ 100.00
Travel for Employee Training	Negotiated

In the **I COMPLY** system we custom write the materials with your information based on a questionnaire that is filled in when we receive your partial payment, full payment is expected when materials are delivered. The program includes training for Hazard Communication, Lockout / Tagout and Respirator on Video and the others are designed to be read to the employee. Test materials are included to cover all seven components.

Upon receipt of your application with 50% of the application fees you will be contacted by S&ECC to arrange for your inspection if you requested this service. At time of inspection or delivery of the **I COMPLY** materials we request the remaining fee. If we are required to inspect your facilities we will consult privately with your management designee and follow-up with our written evaluation of your facility, which will include our recommendations for your compliance.
